## OB TraceVue Audit Trail

Audit trail entries always reflect the PC and user configuration at the time the entry was made. The PC is identified by its network hostname.

PC Name

: Customizable name of the PC.
This identifies the PC for the clinical users. This name was attached to the hostname by the user.

PC Type : Type of installation of the PC (Server, Standalone, Client, WebClient, ..).

This type was attached to the hostname by the setup or first startup of a WebClient.

PC Location : Type of the location where the PC is placed. (Local, Remote,  $\ldots$ )

This location type was attached to the hostname by the user.
