OB TraceVue Audit Trail

Audit trail entries always reflect the PC and user configuration at the time the entry was made.
The PC is identified by its network hostname.

PC Name      : Customizable name of the PC.
               This identifies the PC for the clinical users.
               This name was attached to the hostname by the user.

PC Type      : Type of installation of the PC (Server, Standalone, Client, WebClient, ..).
               This type was attached to the hostname by the setup or first startup of a WebClient.

PC Location : Type of the location where the PC is placed. (Local, Remote, ...)
               This location type was attached to the hostname by the user.

****************************************************************************************
